

To: Fraser Valley Child Development Centre (FV CDC) Families
From: Karen Dickenson Smith, Executive Director
Date: January 26, 2022
Subject: Update on FV CDC COVID-19 Response

We recognize the impact COVID-19 has had on individuals, families, and communities, and acknowledge that many of the families we serve are under stress, rapidly adjusting due a child's or family member's illness, school disruptions, and other factors. Our message remains: We are here to support you.

Due to the spread of the Omicron variant, FV CDC has reinstated it's COVID Safety Plan. Health and safety remain at the forefront and therefore, safety protocols such as a client checklist, occupancy limits, plexiglass barriers, ventilation, spacing, mask requirements, and sanitizing have been kept in place and will continue to be monitored and evaluated as we follow Provincial Health Officer and WorkSafeBC guidelines. FV CDC's COVID Safety Plan can be found on our website under the Covid Response tab called [COVID-19 Occupational Health and Safety Plan](#)

At this time the majority of our services will continue to be delivered virtually and by phone with some in person visits being provided based on urgent need. Our offices remain open and most staff members are working virtually with the ability to be contacted on their cell phones. We ask that you please be patient as we navigate this challenging situation and understand that some staff members will be available for in person visits and some members will not due to varying personal health factors.

If you have any questions, concerns, or require more information about service delivery please contact the relevant Service Leader listed below.
