FVCDC walks beside families on their journey so they are not alone

Diverse abilities come in many forms. They are visible. They are invisible. They cross all ethnicities. They can be overwhelming for children and families who live with them. The Fraser Valley Child Development Centre walks besides these families on their journey, so they are not alone.

Our vision is a world where all people are welcomed to participate meaningfully in family and community life. We support over 4000 children and youth in the Fraser Valley annually. With your support, we can provide more children and their families with the support they require.
