

Strategic Path 2025-2028

Building on success and focusing on five key priorities.

 *The wrap-around, family-centred nature of care was exceptional. FVCDC employees always followed up with our family; we didn't have to chase anyone to complete the tasks they promised." - FVCDC Parent*

Access to equitable, high-quality, and timely care

We believe every child, youth, and family should receive the support they need without unnecessary delays or obstacles. This means reducing wait times, expanding our services, and removing barriers so that high-quality care is accessible to all when it's needed most.

Workforce Well-being

Our dedicated team is the heart of FVCDC. Investing in the well-being of both staff and leadership translates to better support for the families we serve. We foster a supportive, inclusive work environment that recognizes diversity, values individual strengths, and promotes autonomy and collaboration.

Inclusive and Culturally Safe Communities

We strive to create spaces where every family feels valued, respected, and understood. This means embracing diversity, partnering with Indigenous and other cultural communities, and ensuring our services are welcoming and sensitive to the unique needs of all families.

Seamless Service Navigation and Communication

Navigating support services can be challenging, so we're committed to making it easier. By enhancing communication and simplifying our processes, we empower families to access and understand our services with clarity and confidence, ensuring they feel supported every step of the way.

Sustainable Growth and Resilience

Looking ahead, we're building a future-ready organization. Through thoughtful expansion, innovative solutions, and strong advocacy, we're ensuring FVCDC can continue to meet the evolving needs of our community. Our goal is to be resilient and adaptable, so we can support families now, and in the years to come.

By building on the progress of the past four years, we will continue to provide flexibility while integrating structured benchmarks that offer clarity and shared accountability. This approach ensures our team remains resilient, well-equipped, and empowered to provide the best possible care.
